

Multichannel Transmission Systems Operator-Maintainer (25Q)

- ✓ Enlisted
- ✗ Officer

- ✓ Active Duty
- ✓ Army Reserve
- ✓ Open to Women
- ✓ Entry Level

Overview

A multichannel transmission systems operator-maintainer works directly on equipment that communicates through more than one channel. They are responsible for the maintenance check of these devices, antennas and associated equipment.

Job Duties

- Maintenance on assigned equipment, vehicles, security devices and power generators
- Analyze BIT/BITE diagnostics to isolate faults in the Line Replaceable Units

Requirements

Those who want to serve must first take the Armed Services Vocational Aptitude Battery, a series of tests that helps you better understand your strengths and identify which Army jobs are best for you.

Training

Job training for a multichannel transmission systems operator-maintainer requires 10 weeks of Basic Combat Training and 15 weeks of Advanced Individual Training with on-the-job instruction. Part of this time is spent in the classroom and in the field.

Some of the skills you'll learn are:

- Operating multi-channel transmission equipment and diagnostic equipment
- Performing maintenance on associated transmission vehicles
- As your career continues, you will take more classes and training

Helpful Skills

- Interest in working with radios and transmissions
- Ability to apply electronic principles and concepts
- Enjoys working on electronics and fiber optics
- Good at solving problems

Required ASVAB Score(s)
